WORK HISTORY

JR Software QA Tester, 06/2018 to Current

Robert Half – Burbank, CA

I develop and execute test plans and functional (Automated and Manual) use cases to ensure that products meet user needs and business requirements. Develop and maintain testing strategies that includes design, execution, and documentation of test cases, defects tracking, and test coverage analysis. Identifies and recommends changes to enhance the overall effectiveness of system and overall solution testing strategies.

Supplier Operations Manager, 10/2014 to 09/2017

Wayfair – Ogden , Utah

I piloted a liaison position between Wayfair and many of our suppliers. I worked extensively with our SQL databases to collate vast amounts of information necessary to the execution of my duties. During my time at Wayfair I developed problem solving and critical thinking skills that quickly advanced my career to Operations Manager within just 9 months.

Account Development Representative, 09/2013 to 09/2014

AdRoll – San Francisco, CA

I was a marketing consultant for eCommerce businesses. I built cookies to track users interaction within the site

and develop an online re-targeting campaign to drive sales. I was asked to start up a team of 3 individuals to specialize in the tech vertical, with that we held weekly meetings and put together training sessions that ended up raising our close rate.
